Bito Technologies

REBEL FOODS

India's Largest cloud kitchen company rely on Bito enterpirse applications paltform for procurement of kitchen goods & services.

Rebel Foods Private Limited is the largest QSR (Quick Services Restaurant) company in India. Running more than 375 cloud kitchens across India & other countries. In the year 2022 company automated the process of gas procurement from Bito Technologies private Limited.

Rebel Foods private limited owns many food brands like Behrouz and Fassos. Bito is hired to deliver the solution for the gas procurement in kitchens. In a very short span of time Bito has delivered and implemented the solution as per the requirement. The application is a web based cloud application. There are multiple level approvals and validations are implemented, just to ensure that operations should be as per the company policy. Client organization itself felt that their process of gas procurement and duration of payment is reduced considerably. Besides this structured data also help for effective decision making.

Procurement solutions for large scale organizations are itself very complex process. Customization based on the client requirement is another big challenge. While implementation Bito Technologies was always clear in mind that, ease of use is the key of success in any application implementation.

Key Challenges

Dynamic prices of the Oil and gas and generation of orders and bills based on that
Multiple levels of verification, approval and monitoring
Develop a system to stop the access utilization of gas

Bito Technologies has delivered the application as per the client requirement. This application not only used as a toll to streamline the process but also like a DSS application. Which helped client organization for data analysis and decision making.
