

How does a Real Estate Giant got an ERP to control all its operations and start delivering outstanding services to its customers, associate & Channel Partners?

Company sell more than 500 properties in a year, and keeps an inventory of more than 4000 properties in a time.

Yug India Private Limited is one of the fastest growing real estate company based in Lucknow, Uttar Pradesh. Yug India is also one of the leaders in developing nonresidential area into beautiful residential cities. The company provides an opportunity to implement **Real Estate Management ERP Software REMS V5.1.1** in the company to Bito Technologies. The company want to see that how an ERP can reduces the payment cycles of customers and give efficient method to monitor all company operations through a single system.

Real estate sector in India is one of the most unorganized sector as there are lots of government policy involvement and involvement of too many external organizations & People like sellers, brokers, associates, customers, lawyers etc. This is the reason, why providing a unified system to this industry is difficult.

Key Challenges

- Bring uniformity in all associates and timely distribution of correct commission
- TDS management of associates
- Management of Cash and Bank
- Customer Management and reducing the number of delay payments
- automate the operations
- Storing all Data Digitally.

Yug India Achieved upto **90% automation** in whole company operations.

Key Deliveries

- An ERP solution for all the departments and almost all department goes upto 90% Automation of process
- Mobile App for customers to check their balance installments and with online payment facility.
- Mobile App for associates to check available property and their prices. Also check their team and commissions.
- Integrated website so need not to manage different portal for updating website.
- Web Portal for Customers for all operations similar to their app
- Web Portal for Associates for all operations similar to their app
